## Reflection Task – Week 7

Which Modules did you target since the last reflection?

Predicate Logic, Sets and Functions, Relations and Graphs

How much did you complete?

Finished and submitted Predicate Logic and Sets and Functions, Starting on Relations and Graphs

What worked well with your previous study plan? Reflect on

- time-management
  No changes from last Reflection Task
- self-management

What didn't work as well as planned? Reflect on

- time-management
  - No changes from last Reflection Task Everything seems to be working well at the moment.
- self-management
- how did/could you overcome these obstacles?

What risks do you anticipate impacting negatively on your study in the next few weeks?

With the changes I have made to my study plan I don't anticipate any serious risks impacting my study other than what has been mentioned in previous Reflection Tasks

What strategies can you put in place to mitigate these risks?

Based on the above reflections,

- What (if anything) did you change in your study plan? Justify
  - I have pushed back the due dates for everything from Relations and Graphs back a week, this still leaves 2 weeks between the last assessment due date and the exam, this should leave me plenty of time for exam revision and lessens some of the stress for assessment due as another unit I am doing has a much higher course load than I was expecting (Cyber Security Analytics)
- What will you change in your approach to study? Justify

## **Learning Plan Review**

Review your learning plan below

Module	Previous Plan	New Plan	Status
P tasks (Core Modules)			
Number Theory	5 April	5 April	Submitted
Propositional Logic	12 April	17 April	Submitted
Predicate Logic	19 April	24 April	Submitted
Sets and Functions	26 April	26 April	Submitted
Relations and Graphs	3 May	10 May	In Progress
Proofs	10 May	17 May	Incomplete
Recurrence and Induction	17 May	24 May	Incomplete
Counting	24 May	31May	Incomplete
Exam Revision	8 – 17 June	8-17 June	
Exam	17 June	17 June	
C tasks (Advanced Modules)			
Advanced Module 1	Not Targeted	Not Targeted	Not Targeted
Advanced Module 2	Not Targeted	Not Targeted	Not Targeted
D tasks			
Advanced Module 3	Not Targeted	Not Targeted	Not Targeted
Own Topic	Not Targeted	Not Targeted	Not Targeted
